

Special Issue

Global Engineering and Sustainable Development

Message from the Guest Editor

The aim and scope of this Special Issue of *Sustainability* is to present and review emerging engineering methods, technologies, and evidence that work to address the unequal and unjust distribution of access to basic services such as water, sanitation, energy, food, transportation, and shelter. Examples may include technology and methods development and validation, data collection, and impact evaluations that can contribute to evidence-based influence on policies and practice. Examples may place an emphasis on identifying the drivers, determinants, and solutions favoring equitable access to basic services. Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments, and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
