Health in All: Global Health and Sustainable Development Goals

Message from the Guest Editors

Health has a key position in the global agenda through SDG-3 and is closely linked to other goals related to poverty, hunger, education, gender, economic inequalities, and water and sanitation, among others. In fact, the SDGs represent a unique opportunity to promote public health through an integrated approach to public policies across different sectors (the 'Health in All' approach defined by the WHO). Thus, the achievement of health goals will require policy coherence to reinforce synergies between certain SDGs and minimise trade-offs. The development of such policies and strategies needs robust empirical examination of the association, causation, and impact of changes in indicators of other SDGs on health and vice versa. In this call for papers, *Sustainability* welcomes accounts of studies exploring the following themes:

- Measurement and monitoring of SDG-3 targets
- Impact of COVID-19 on SDG-3 targets
- Role of other SDGs in global health convergence
- Public health spending and SDG-3

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
