

## Special Issue

# Good Practices of Sustainable Development in Agriculture

### Message from the Guest Editors

The complexity of sustainable development in agriculture is out of question, and it is increasing as we speak. As result of its vastity, the stakeholders involved into the process of defining, planning, implementing, evaluating and forecasting the future trends of the phenomena would appreciate having a collection of success story based on others' previous experiences. The objective of this special issues is to enroll the energy of all actors in the sustainable development process and to promote an efficient flow of information, exchange of ideas and good practices and cooperation between actors, grouping all organizations and institutions involved in sustainable development. We expect to see here successful examples of creating an agricultural and forestry economy based on farms that must be committed to modernization; efficient models of developing of an agriculture that favors biodiversity and environmental conservation; valuable ideas for improving the quality of life and economic development in rural areas; and replicable solutions for improving local governance in order to create and implement sustainable development strategies in agriculture.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
