

Special Issue

Green Chemistry for Environmental Sustainability

Message from the Guest Editor

The literature published so far mostly addresses green chemistry and environmental approaches separately, but the current Special Issue exclusively concentrates on the interdisciplinary dependence between these two significant research areas. Thus, in this Special Issue, we welcome interdisciplinary research works which exclusively discuss green chemistry related to biomaterials, health sciences, medicinal chemistry, food sciences, and the analytical field by supporting the environmental sustainability approach.

The purpose of this Special Issue is to encourage authors to use this opportunity to publish more environmentally friendly approaches and develop greener protocols for humankind. This Special Issue aims to initiate the advancement of the existing literature in the coming decade and to offer a platform for future innovations and for developing more sustainable approaches.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
