Special Issue

Frontiers and Best Practices in Bio, Circular, and Green Growth and Eco-Innovation

Message from the Guest Editors

After almost two decades of continuous development in bio, circular, and green economy, the time is ripe for the assessment of the major achievements and challenges that private and public enterprises face today for the further enhancement of these global sustainability concepts. The present Special Issue welcomes the contributions which focus on the nexus between public policies, institutions, quality of public sector management, and patterns of interaction between government and private business in backing bio, green, and circular economy practices and eco-innovation. In addition, the differences between implementation of new organizational forms and scientific innovations in the technologically advanced and developing settings are in the scope of this Special Issue. We also invite contributions with a focus on the role of civic engagement and diffusion and proliferation of innovations at the initial, economically not viable initiation phases, as well as on the nexus between civic engagement and emergence, development, and diffusion of the abovementioned sustainability concepts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
