Special Issue

Advances in Gas Separation Technologies for Green Process Engineering

Message from the Guest Editors

Separation or purification in gaseous streams has been considered as an important aim, involving a large number of research fields and funded projects around the world. These targets have evolved in the last decades and maintains their importance in research related with the chemical industry, and have mainly been boosted to address technological issues and international regulations such as the carbon dioxide processes of separation or capture, hydrogen purification, or volatile organic compounds removal. These are important aspects so that the industry can meet the challenge of sustainability with energy efficiency, renewable energy use, and resource optimization. Present Special Issue attempts to show the current situation of the development and application of new technologies for gases separation and purification, from the laboratory to uses at higher-level scales such as demonstration plants.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
