

Special Issue

Green Technologies for Environment, Health and Sustainable Development

Message from the Guest Editors

The safeguarding of the environment and human health is an integral part of sustainable development, aspects threatened by a wide variety of environmental crises and problems. Green technologies, also known as clean and/or eco-friendly technologies, offer enormous opportunities towards achieving SDGs by meeting the societal needs whilst reducing environmental impacts of conventional technologies, removing hazardous environmental pollutants, minimizing the volume of wastes. This Special Issue aims to collect both original research and review papers reporting on newly developed green technologies, as well as recent advancements in existing technologies for environmental remediation, water and wastewater treatment, waste management, and biofuels and bioenergy production. In addition, papers focusing on novel approaches, biomarkers and analytical methods developed for the assessment of environmental pollution, contaminant dynamics, and associated risks are also welcome. This Special Issue will provide a comprehensive and insightful view of the recent developments in green technologies for promoting environmental sustainability towards achieving SDGs.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
