

## Special Issue

# Green Information Technology and Sustainability

### Message from the Guest Editors

The current Special Issue compiles research articles and discusses green information technology in relation to the more complex topic of sustainable development. The objectives of this Special Issue are to provide a thorough analysis of the status, potential, challenges, and recent developments of approaches in green information technology and sustainability, and to explore the issues surrounding the innovative and original research. We invite researchers and experts to submit original research and review articles that describe this innovative processes with evidence of its successful application in the field. Manuscripts based on integrated and interdisciplinary approaches, theoretical discussions to encourage artificial intelligence methods contributing to the sustainable development of processes, green supply chain management and sustainability assessments based on intelligent decision making, as well as the adaptation of approaches from other fields, are particularly encouraged.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
