

## Special Issue

# Strategic Approaches to Sustainability in Green Operations and Supply Chain Management

### Message from the Guest Editors

This Special Issue aims to explore the latest strategic approaches to effective green operation management and green supply chain management. Green operation management addresses environmental and social issues in operations, aiming to achieve sustainability without ignoring the financial aspect. Many different aspects of operation and supply chain management are considered from a sustainability perspective, including product design, manufacturing, purchasing, and transportation. Various approaches to achieve sustainability have been used, including lean manufacturing, reverse logistics, risk management, and performance measurement. This Special Issue welcomes both theoretical and empirical contributions, defining strategic approaches in green operations management and green supply chain management. Authors can address various strategies based on efficiency, innovation, risks, or product life cycle. They can also deal with various functions, such as product design, including packaging, manufacturing; emissions, wastes, and energy; reverse logistics; and purchasing, including suppliers' green competencies, sales, and marketing.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
