

## Special Issue

# Advanced Application of Green and Sustainable Computing

### Message from the Guest Editors

Green and sustainable computing supports business-critical computing needs with the least possible amount of power and sustainable development. Green and sustainable computing is essential for all classes of systems, ranging from handheld systems to large-scale data centers. In the past, the primary focus of green and sustainable computing was on IT infrastructure that includes power, cooling, renewables, and data center space. In recent years, many research fields have emerged, such as artificial intelligence, AI-empowered systems, edge computing, blockchain, IoT, and industrial systems. These novel fields also have green and sustainable issues. This Special Issue encourages the submissions related to but not limited to:

- Application of green and sustainable computing in data centers, cloud computing, edge computing, blockchain system, AI-empowered system, IoT system, and industry;
- Energy and thermal estimation approaches;
- Optimizations on energy efficiency, thermal efficiency, and renewable energy utilization.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
