Special Issue

Green Technologies for Wastewater Treatment, Remedial Option Evaluation and Implementation

Message from the Guest Editor

This Special Issue is dedicated to publishing novel research works that are developing and promoting innovative green technologies for wastewater treatment and cleanup strategies to restore contaminated sites, while promoting environmental stewardship. The sustainable development of green technologies and cleanup strategies can help increase environmental protection, but does not preclude economic development and social benefits. In this Special Issue, we welcome a broad range of manuscripts that encompass emerging techniques, technologies and strategies to treat wastewater and ground sustainable environmental remediation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
