

Special Issue

Green Tourism with Event and Convention Industry

Message from the Guest Editor

Dear colleagues, Green tourism is low-impact tourism focused on protecting the ecology of an area while keeping local communities thriving. In recent decades, more resort areas have taken steps to exert less of an impact on surrounding environments, and sustainable tourism is therefore becoming more assessible. This Special Issue aims to move the current event and conference industry towards sustainability. Potential submmision can be focusing on disscussion of current issues, impacts, conflicts, opportunities, concerns, rationales, or innovative approaches to the development of the global green tourism industry, particularly in the events and conference sectors worldwide. Academics and relevant stakeholders can submit manuscripts in various forms. Papers selected for this Special Issue will be subject to a rigorous peer review procedure with the aim of the rapid and wide dissemination of research results, including models of development and their applications.

- green tourism
- event
- festival
- conference
- MICE industry

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
