

## Special Issue

# Greenwashing Strategies and Their Effects on Stakeholders' Perceptions

### Message from the Guest Editors

In recent years, corporate environmental performance has increased dramatically, together with documented cases of greenwashing. The term “greenwashing” refers to misleading communication strategies enhanced by firms whose activity may have an harmful impact on the environment. The final aim of greenwashing is, therefore, to form overly positive beliefs regarding firms' environmental practices or products. This Special Issue embodies the varied research analyzing greenwashing either at a firm or at a product level. Therefore, we invite to collect both theoretical and empirical evidences covering a wide range of multidisciplinary aspects related to the phenomenon of greenwashing.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
