

## Special Issue

# Advances in Groundwater Quality and Protection for Sustainability

### Message from the Guest Editor

This special issue aims to enhance knowledge of groundwater quality and groundwater protection in the academia. Global climate crisis significantly affects water cycle systems and alter the quality of groundwater resources that are essential for survival. Advanced strategies are needed to secure environmentally sound groundwater resources for the next generation against natural and artificial threats. Hydrogeologists, policy maker, engineer and ecologist who interested in this special issue can now submit their manuscripts for the protection and sustainable use of groundwater resources. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following: (1) Sustainable management of groundwater resources (2) Regional aquifer systems under climate crisis (3) Advanced technology and strategies for sustainable use of groundwater (4) Tracing flow systems using chemical and isotopic indicators (5) Groundwater quality and contamination (6) What's next with emerging contaminants? (7) Ecohydrology variability (8) Groundwater remediation

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
