

Special Issue

Green Technologies towards Cleaner Production and Sustainable Development

Message from the Guest Editors

Despite the relevance of Green Technology development for economic and environmental sustainability, few studies identify and explore its strengths and weaknesses so as to analyze how GT implementation can lead to more progressive environmentally-friendly economic development, or highlight the importance of green technology, the adoption process, and efficient energy resources in transitioning enterprises. Further, much less is known about the cleaner production technology that supports strategic planning initiatives to achieve sustainable development goals. We are looking for papers on: green technology; cleaner production; sustainable development; Sustainable Development Goals (SDGs); green innovation; circular economy; environmental sustainability; emission reduction; green transportation; sustainable investment; sustainability performance; novel business models; clean energy technologies; green economy; ISO 14001. More information is available on the Special Issue website.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
