Special Issue

Climate Change and Sustainable Disaster Management

Message from the Guest Editors

Decision-making appears to be a major concern in the face of adverse climate change impacts in order to ensure local and global sustainability. We hope to provide critical knowledge on climate change and potential climate change mitigation measures through evidence-based research and its implications. New research insights can provide guidelines for the next generation by ensuring environmental and social sustainability. Our Special Issue extends the scope of how climate change impacts threaten world food security through damaging agricultural systems from scientific and social perspectives, how people adapt to climate-induced food insecurity locally, and which knowledge and practices might be effective or contribute to reducing risks. We welcome research on agro-meteorology, climate change mitigation, agricultural adaptation, climate-induced food insecurity, agricultural sustainability, and relevant policies that could contribute to secure food and policy formulations. For this purpose, empirical and theoretical research is welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
