Heritage Building Information Modelling

Message from the Guest Editors

Heritage Building Information Modelling (HBIM) is now proposed as a novel approach for parametric modelling and integrated process management based on the BIM philosophy. Therefore, we cordially invite researchers and practiotioners to submit papers on how HBIM helps for the following topics and beyond in cultural heritage:

- Advancing the restoration practice;
- Enhancing data capture and management for operations and maintenance;
- Improving the stakeholder engagement;
- Analysing and monitoring the energy performance;
- Automate asset management processes for heritage building owner organisations.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
