

Special Issue

Healthy Eating and Sustainable Consumption in Foodservice Industry

Message from the Guest Editor

As far as the consequences and impacts of the sustainability of food consumption/practices in the foodservices sector and incidental effects are concerned, the body of research on foodservices is rather limited. These gaps underscore the need for theoretical and practical research to advance the progress on sustainability in the foodservice sector by addressing central research issues, which is the reason behind the current call for papers. Consumer attitudes, menu choices, packaging strategies, sustainable practices, and communication strategies have all impacted public health, the environment, society, the economy, and even climate change. Thus, gaining a better understanding of consumers' behavior towards healthy eating and sustainable consumption and the role of businesses is crucial. The aim of this Special Issue is to collect research relating to sustainability in the foodservice sector, where consumers and businesses play a role in improving healthy eating and sustainable consumption. The topics can be found at the Special Issue website.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
