

Special Issue

High-Quality Education Equity for Promoting Educational Sustainable Development

Message from the Guest Editors

The core tenet of sustainable education is high quality. With the rapid development of society, different countries have shaped different innovative educational concepts and practices with regard to promoting high-quality education development worldwide. The biggest problem is that there is no focus on the sustainable quality of education; instead, this Special Issue is focused on the fair distribution of high-quality education. We are interested in manuscripts that analyze and investigate high-quality education equity both from the theoretical and conceptual points of view, as well as from the quantitative and statistical viewpoint. We consider high-quality education equity for promoting sustainable educational development as a multidisciplinary issue in which various researchers are engaged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
