Special Issue

Reconciling High Tech and Low Tech for Sustainable Urban Mobility

Message from the Guest Editors

This Special Issue calls for a reflection on what can be defined as low- or high-tech mobility usages and solutions. In that spirit, could we imagine low-tech automated vehicles or shuttles, a frugal perspective on Mobility as a Service? Is an electric scooter high or low tech? Do we need to support urban walking and active modes by technology, and to what extent? How can we account for the direct and indirect impacts of both trends (high- and low-tech mobility) for citizens, local authorities and mobility providers? In this Special Issue, the goal is to surpass the dichotomy and investigate whether the two concepts of high tech and low tech can be reconciled to lead to sustainable urban mobility, which is at the same time targeting resilience and liveability of cities.

- Resilience refers to the capacity of a city to recover in times of crisis (e.g., the sanitary COVID-19 crisis, cyberattacks), or natural crises (e.g., floods, heat waves), or related to environmental challenges (e.g., pollution, GHG emissions);
- Liveability refers to the quality of life in cities for all, with aspects of inclusiveness and equity as well as joy and aesthetics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
