

Special Issue

Human-Centric Urban Services

Message from the Guest Editors

This Special Issue deals with the kinds of novel services that can be provided to citizens in smart cities. What kinds of urban services can improve the quality of our lives rather than fewer public utility charges and fewer traffic jams? To solve these problems, we need to investigate more human-centric urban services. Thus, this Special Issue will collect papers focusing on discovering new problems that are closer to citizens in smart cities. It is difficult for scholars of information technology to conduct this exploration on their own. Therefore, this Special Issue aims to gather various opinions from different research areas, including computer science, urban planning, urban policy, civil engineering, etc. Thus, this Special Issue attempts to discuss novel research directions and contributions related to novel urban services for citizens in the big data and IoT era.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
