

Special Issue

Human Dimensions of Conservation Research and Practice

Message from the Guest Editors

This Special Issue focusses on the human dimensions of conservation, spotlighting case studies of localised initiatives which have substantially integrated human well-being outcomes within their design. This Special Issue aims to contribute to conservation impact by featuring case studies of localised conservation initiatives. It will showcase “what works (or does not work) in conservation and why” and thereby, provide a resource of ideas for those working at the frontlines. It will also direct the attention of the academic community to research topics that can create more effective and, therefore, sustainable efforts in the future. Some topics for consideration include:

- Management of political risks and uncertainty
- Justice, equity, diversity and inclusion
- Using sustainable development agendas as vehicles for conservation
- Reflections on conservation as a social practice and the science of sustainability
- Conceptualisations of sustainable human–nature relationships

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
