

Special Issue

Human–Environmental Relations: Promoting Sustainable Tourism

Message from the Guest Editor

Sustainable tourism depends on people's wellbeing and the health of the planet. Human–Environmental Relations: Promoting Sustainable Tourism is an important topic that continues to attract significant attention from scholars, tourism businesses, destination marketers and managers, policymakers, tourists and the host community. This Special Issue is focussed on innovative contributions that can contribute to promote human bonds with environmental settings. It focuses on providing healthy and safe places to promote the wellbeing and quality of life of both the host and guest and safeguard our planet, which provides the resources on which tourism is sustained. The goal of this Special Issue is to provide an open access resource to educate businesses and communities about incorporating sustainable behaviours protecting our planet's resources, and empowering communities to improve the social, environmental, and economic impacts of tourism.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
