Special Issue

Small-Scale Hydropower and Energy Recovery Interventions: Management, Optimization Processes and Hydraulic Machines Applications

Message from the Guest Editors

The topics included in this Special Issue are the following:

- Current state-of-the art of small-scale hydraulic machines, with particular attention to small-scale hydropower plants (e.g. run-of-the river hydroelectricity) and energy recovery in irrigation networks, WSSs, WDNs and industrial plants;
- Future prospective of these research fields in upcoming years;
- Models and technologies that lead to an efficiency improvement of small-scale hydropower plants (e.g. run-of-the river hydroelectricity), irrigation networks, WSSs, WDNs and industrial plants (e.g. models for forecasting novel hydraulic machines performance, management and optimization processes of irrigation networks, WSSs, WDNs and industrial plants where the installation of hydraulic machines is possible);
- Development of new methods for energy performance forecasting and enhancing small-scale hydropower plants (e.g. run-of-the river hydroelectricity), irrigation networks, WSSs, WDNs and industrial plants where hydraulic machines can be installed or they are already operating;
- Case studies where the energy recovery in irrigation networks, WSSs, WDNs and industrial plants is applied by means of hydraulic machines.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
