

## Special Issue

# What Influences an Individual's Pro-environmental Behavior?

### Message from the Guest Editors

Climate change is one of the most (or maybe the most) important threats facing humankind. The challenge of sustainability lies in human hands by minimizing environmental impact or benefitting the environment through human behavior. Thus, pro-environmental behavior is increasingly becoming a vital factor in psychology. The focus of this Special Issue is the specification of determinants that are positively related to pro-environmental behavior on the one hand, and, on the other hand, characteristics that hinder people from behaving pro-environmentally. Future interventions could build on these findings to promote pro-environmental behavior. In conclusion, we call for articles that investigate (positive and negative) determinants of pro-environmental behavior for this Special Issue in Sustainability. Inter- or transdisciplinary approaches are welcome, as long as these contribute to the psychological research question.

### keywords

- determinants of pro-environmental behavior
- environmental psychology

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
