

Special Issue

Urban Inequality and Exclusion

Message from the Guest Editor

The past ten or so years have been characterized by recurring crises, including the financial and economic crisis, the migration and refugee crisis, and the COVID-19 crisis. Additionally, the climate change crisis is a long-enduring crisis. Although all these crises affect global society comparably in principle, cities are impacted more severely and comprehensively, because they represent places where social, political, economic, and cultural conflicts are tightly and densely interrelated. In fact, a continuously growing urban population will accentuate the effects of crises in the future. Political and societal measures which seek to cope with problems of urban inequality and mechanisms of exclusion have long been available, and have been further developed to date. Human and civil rights in general and the right to the city [1] or the right to housing movements in particular, illustrate an endeavor to approach the idea of a just city [2]. Currently, efforts to implement the UN Sustainable Development Goals are being taken up to reduce poverty and inequality or to safeguard a healthy environment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
