

Special Issue

Lithium Batteries and Fuel Cells for a Sustainable Future

Message from the Guest Editors

To address the climate crisis and build a net-zero carbon emission society, the world has witnessed incredible growth in demand for developing renewable energy storage and conversion technologies. This special issue is intended to bring the latest updates in the field of lithium batteries and fuel cells. Original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Stabilizing anodes in lithium-ion batteries and lithium-metal batteries
- Electrolyte design for advanced batteries
- Separators modification for lithium batteries
- Developing novel binders for batteries
- Advanced cathode materials with high energy densities
- Electrode-electrolyte interphase
- Catalyst development for fuel cells
- Advanced membranes for fuel cells
- Aging problems for fuel cells
- Heat and mass transport in fuel cells or batteries
- Computational design and optimization of fuel cells and fuel cell systems
- Advanced characterization techniques
- Theoretical simulation and modeling

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
