

## Special Issue

# Innovation and Sustainable Development of Seamless Education and Teaching Methods

### Message from the Guest Editor

This Special Issue is dedicated to the promotion and dissemination of knowledge on methods, strategies and technologies to increase the sustainability of the development of the future of education and the new social contract for education by considering global challenges such as globalisation, changing demographics, digital transformation, climate change, environment and social pillars of sustainable development. We face the dual challenge of delivering on the unfulfilled promise of ensuring the right to quality education for every child, youth, and adult, and of fully realizing the transformative potential of education as a pathway to a sustainable collective future. To achieve this, there is a need for a new social contract for education that can address inequities while transforming the future. Sustainability is also a perfect field for the interdisciplinary and multicultural assessment of complex systems. In light of all this, this Special Issue is intended to provide an opportunity to develop, discuss, share, and disseminate new ideas within the fields of *Innovation and Sustainable Development of Seamless Education and Teaching Methods*.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
