Special Issue

Sustainability and Innovation in an Era of Global Change

Message from the Guest Editors

Currently, climate change and environmental degradation represent an existential threat to the world, and a transition into a greener, more sustainable, economy is urgently needed. This transition requires action from all actors and within all sectors of the economy. A further societal challenge is that of ensuring that this transition is just and inclusive for all. To address this area of research, the proposed Special Issue calls for papers that present work on topics including, but not limited to, the following: 1. Sustainability and the COVID-19 pandemic; 2. Sustainability, incentives, and impacts; 3. Climate change policy, economics, and finance; 4. Energy transition and the future of mobility; 5. Industry transition and decarbonization; 6. Green innovation, land use, and agriculture; 7. Affordable clean energy, sustainable water management, and poverty; 8. Green agenda and circular economy; 9. Youth and sustainability: bridging sustainability priorities for early career professionals; 10. Advancing gender equality in green innovation and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
