

## Special Issue

# Sustainable Innovation Trends and Global Value Chains in Emerging Markets

### Message from the Guest Editors

The global economy is at a major inflection point due to the current COVID-19 situation and worldwide supply chain disruptions, and 'resilience' is needed for global organizations and emerging markets to survive through structural redesign and performance re-planning with a view on long-term impacts. In this Special Issue of *Sustainability*, we invite submissions focused on sustainable innovation trends and global supply chains as value chains in emerging (versus developed) economies, international trade, and interrelationships amongst logistics, supply chain management, and global trade. We welcome submissions that offer important conceptual and empirical insights into the nature and processes of sustainable development, sustainable innovation, GVCs, GVC approaches and frameworks in different world economies, and global supply (value) chains. Of interest are papers that examine the impact of cross-cultural issues, characteristics, and challenges with regard to sustainable innovation trends and GVCs with regard to emerging world economies.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
