

Special Issue

Innovations in Building Processes and Policies for the Energy Renovations of Buildings

Message from the Guest Editors

This Special Issue calls for papers addressing approaches, theories, case studies and strategies on process innovation for building energy renovations. It seeks for the root problems that cause the low renovation rate from the perspectives of policy makers, market stakeholders, professionals, occupants, etc. It addresses the multifaceted phenomena with a deep understanding of the institution and process (barriers and transaction costs), people (cognition and behaviour) and resources (information, incentives and intervention) combined. For more details, please visit: https://www.mdpi.com/journal/sustainability/special_issues/innovations_building_processes_policies_energy_renovations_buildings

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
