

Special Issue

Innovative Practices of Digital Transformation: Technological Evolution and Digitalization in Modern Era

Message from the Guest Editors

Digital transformation is empowering people and organisations to make cultural and behavioural changes in new ways. It is important to understand how technology evolves and how each new upgrade of digital technology compounds existing technologies to create a better environment. Future technological developments in digital transformation, such as the continuous evolution of smart devices and rise of artificial intelligence (AI) technology, Internet of Things (IoT)—embedded software and electronic systems and Cloud computing—data storage and maintenance, augmented reality/mixed reality, cybersecurity and data privacy, Big Data, etc., are promising.

This Special Issue is a significant work that responds directly to issues that are crucial to the future of the following sectors: industrial operations, education, transport, food and beverage processing, farming, water irrigation and distribution, and energy production and maintenance.

Proposals are invited to discuss and present your research on innovative practices of digital transformation as well as technological evolution and digitalisation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
