

## Special Issue

# Food Waste Management and Innovative Sustainable Valorization Strategies in Different Countries

### Message from the Guest Editors

The main objective of this Special Issue is to share recent knowledge about the emerging solutions and strategies to produce less food waste, while using all waste as raw material for other food industries. A critical comparison among different food waste management models across various countries in the form of case studies would be advisable. The outlook of this Special Issue is expected to help in transforming food waste from a problem to a resource, and to achieve several Sustainable Development Goals (SDGs), especially goals 2, 12, and 13.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
