

## Special Issue

# New Insights into Green Building Market

### Message from the Guest Editors

This Special Issue “New Insights into the Green Building Market” aims to stimulate debate and articles concerning the recent changes in the real estate markets, which are positively and surprisingly contributing, as co-benefits of the so-called Green Building Market Price Premium, to the mitigation and solving of climate change and of the planet’s consequent global warming problems. Tested and consolidated, as well as experimental and highly innovative approaches and tools are all welcome in order to fully valorize the great opportunity presented by Green Building Market Price Premium, alongside other premia deriving from brand new green buildings and ecological retrofitting strategies. By extension, these efforts will help to mitigate and solve the tragedy of the planet’s current climate change.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
