Special Issue

Integrated Biorefineries

Message from the Guest Editor

Dear Colleague, This Special Issue of *Sustainability* is inviting original research and review articles that focus on identifying biorefinery integration problems and proposing techniques involved in thermochemical, biochemical and innovative sustainable approaches for the production of a range of bio-based products through maximizing biomass utilization while minimizing waste. Topics of interest include but are not limited to the following:

- Key factors influencing the cost of medium to large scale biorefinery plants
- Environmental aspects of biorefinery plants
- Innovative approaches in biorefinery process optimization
- Sustainable strategies in biomass production and biorefinery process integration
- Resource conservation and waste management
- Environmental impact assessment of biorefinery products

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
