Special Issue

Integrating Agricultural and Tourism Supply Chains for Fostering Sustainable Development in Inner Areas

Message from the Guest Editors

Tourism and agriculture either are key drivers in the development of many inner areas. However, especially in the mountain ones, fragmentation, small business size, and lack of communication among tourism and food chain actors, local administrators, and other stakeholders, affect the economic activities and result in a limited competitiveness of both the sectors. To boost the local economies, the integration of agriculture and tourism chains may be strategic. However, even if the interconnections between the two sectors are clear, not much has been explored to date in order to develop a common vision which really integrates them. Editors welcome all contributes providing theoretical and methodological approaches as well as research results, applications, and experiences on the integration between agriculture and tourism, with a special focus on mountain areas.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
