Process Integration and Optimisation for Sustainable Systems

Message from the Guest Editors

Process integration and optimisation of energy and resource flows within industrial and regional systems provide an engineering basis in the move toward sustainability. Process integration applies a holistic approach to systems design where the performances of individual components are devised to benefit the total system. The importance of holistic thinking can impact system design at multiple scales, from micro-reactors to the processes and sites of entire countries and regions. Circular economy, industrial ecology, industrial symbiosis, and life cycle analysis, are related holistic concepts. In working toward sustainable development and systems, process integration and optimisation, combined with these related ideas, have the potential to extract the maximum value and efficiency of energy and resources, leading to a greener economy that minimizes the release of GHG emissions, particulates, and other harmful emissions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
