

Special Issue

Sustainability of Intelligent Transport Networks

Message from the Guest Editors

Continued globalization and urbanization—resulting in the increase of inter- and intracity trips—present an important challenge to the environmental, economic, and social sustainability of our society. Most efforts currently focused on resolving the issues of emissions, energy, and health and wellbeing impacts of transport relate to improving the efficiency of transport mode design and operation and rethinking the system and developing a more balanced and intermodal system. This Special Issue aims to integrate the smart grid with the smart city using innovative technologies and techniques to ensure sustainable transport for all road users and to expand the use of modern technologies in cities and regions in terms of sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
