

## Special Issue

# Sustainable and Intelligent Transportation Systems

### Message from the Guest Editors

The transportation system is a highly complex system that involves and influences the daily activities of each stakeholder. Targeted at improving the performances of transport systems, the concept of an intelligent transportation system (ITS) has received increasing attention in both academic and industry arenas. ITS is a continuously developed concept that integrates emerging information, communications, computers, and other technologies with advanced transportation theories. Recently, big data, artificial intelligence (AI), electrical vehicles, and connected transportation technologies are rapidly developed and widely applied in transportation fields. On the other hand, the sharing of motilities and various MaaS (mobility as a service) is greatly changing the traditional structures of transportation systems. Utilizing the emerging technologies and rising service modes, ITS should find development paths to make the entire transportation systems more efficient, safe, reliable, and environment friendly. For further reading, please visit the [Special Issue Website](#).

### Guest Editors

Dr. Tomio Miwa

Institute of Materials and Systems for Sustainability, Nagoya University,  
Nagoya, Japan

Dr. Dawei Li

School of Transportation, Southeast University, China

### Deadline for manuscript submissions

closed (30 November 2019)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
