

## Special Issue

# Interdisciplinary Climate Research for Urban Resiliency and Sustainability

### Message from the Guest Editor

Continued inquiry into the dynamics of climate over the last century has improved our understanding of its impacts. However, with increasing urbanization, urban migration, and more pronounced issues related to equity, health, and climate change, cities now face immediate and long-term risks, vulnerabilities, and challenges. This now requires urgent system-level solutions to close the gaps between the diagnosis of climate-related urban challenges and the identification and implementation of appropriate solutions for sustainable futures for our cities. Such climate-related urban solutions can be better designed with multidisciplinary approaches that provide co-benefits and reduce unintended consequences.

Overall, this Special Issue crosscuts multiple urban sustainability and resiliency themes, with climate change as a driver of change and a key ingredient in the research and experimental design. The articles in this Special Issue will guide urban planners and stakeholders in the development of sustainable urban solutions for cities of all sizes, ranging from large cities to small towns.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
