

## Special Issue

# Sustainable Finance and the 2030 Agenda: Investing to Transform the World

### Message from the Guest Editors

This Special Issue focuses on the crucial role that financial markets and investors are expected to play in this framework. Specifically, sustainable finance may contribute to transforming the world through the provision of specific investment strategies, financial activities or financial products associated with these objectives. For that reason, we encourage researchers to submit to this Special Issue all their current research about: sustainable investment decisions and asset allocation; the performance of bonds, mutual funds, indexes or exchange traded funds (ETFs) associated with SDGs; financial risk and opportunities caused by the SGD challenges such as climate change and the transition to clean energy; the relevance of microfinance or foreign direct investment in developing countries; or any other research related to the role of financial markets, financial institutions and financial actors in SDGs.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
