

## Special Issue

# Archaeology, Historical Ecology, and Sustainability of Island Cultures

### Message from the Guest Editors

In this volume we present case studies from islands around the world, each exploring how indigenous peoples survived and even thrived on islands over the *long duree*. Our case studies often counter models of “impact” and “collapse” that have become common in the scientific literature and popular media. They also explore and highlight the resilience of many island cultures and ecosystems, even in the face of the accelerating global changes associated with the Anthropocene.
