

# Special Issue

## Information Systems for Sustainable Tourism

### Message from the Guest Editors

This Special Issue will discuss the challenges presented by information systems' application in the sustainable development of tourism enterprises, tourism administration departments, and the hospitality and hotel industries, presenting new theoretical frameworks and models for various sustainability-related issues in this context. These studies will not only further academic development of this subject but also provide practical implications for the tourism industry. For this Special Issue, we are inviting innovative papers contributing solutions and ideas for achieving sustainability in tourism. We welcome empirical research, case studies, cross-cultural studies, qualitative studies, and applications of the QCA method. Accounts of interdisciplinary and multidisciplinary research are also encouraged.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
