

Special Issue

Applications of Minimally Invasive Imaging Techniques in Cultural Heritage

Message from the Guest Editor

The aim of this **Special Issue** is to present recent advances of the applications of relatively new, minimally invasive imaging methods as diagnostic tools in the service of CH for the *in situ* analysis and studies in real objects. We are interested in original papers and reviews that address the development, optimization and implementation of imaging techniques for obtaining novel and complementary information from various multicomposition, multilayered CH objects and substrates. Techniques include, but are not limited to the following:

- Optical Coherence Tomography (OCT)
- Raman spectroscopy
- Laser induced Fluorescence (LIF)
- THz
- Multi-spectral
- Non-linear
- Photoacoustic
- Diffuse Reflectance
- Interferometric

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
