

Special Issue

Knowledge Management and Human Resources Management for Organizational Sustainability

Message from the Guest Editor

Sustainable development goals attendance demands the use of most common innovation dynamics, for example, knowledge strategies and human resources management. Thus, this Special Issue invites submissions focusing on knowledge management and human resources management as a means to reach organizational sustainability. We encourage interdisciplinary thinking; the main objective of this Special Issue is to approach the involved topics with new perspectives and methods, and to provide evidence from studies developed in original settings. Empirical papers reporting unique, systematic, innovative, and integrative research are targeted for this Special Issue. Bibliometric, systematic, and content literature review analyses are also requested. Both theoretical and empirical approaches are accepted. Submissions of empirical studies using either quantitative, qualitative, or mixed methods analyses are the most welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
