

Special Issue

Knowledge Sharing and Sustainable Development

Message from the Guest Editor

As new knowledge and the data-intensive economy continues to evolve, in view of the accelerating technological revolution and pressures from ecological threats and the Covid 19 pandemic, knowledge and data management is being recognized as a key business asset and a crucial component of national, organizational, and individual strategies. The need for a circular and agile economy at every scale and for sustainable development has never been more acutely evident. The ability to share knowledge, therefore, is quickly becoming vital to secure and maintain organizational survival and success. This Special Issue is encouraging an interdisciplinary fusion between diverse disciplines. Multi-level and multi-discipline chapters that synthesize diverse bodies of knowledge are strongly encouraged. The Special Issue welcomes original research articles, case studies, reviews, critical perspectives, and viewpoint articles advancing theory, concepts, frameworks, and applications in the field of knowledge sharing for sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
