

Special Issue

Land Cover and Land Cover Change Monitoring

Message from the Guest Editor

The current global economic and environmental crisis forces nations to carefully manage their natural resources. This goes hand in hand with the demand for more and better information on the state of the environment. Hence, the need is increasing more and more to identify developments and trends as early as possible and to assess their impact for environmental and spatial planning policies in order to avoid or counteract harming activities and for providing the basis for sustainable management. Land cover and its change can provide important environmental indicators to support these needs, leading to a much stronger use of remote sensing on all scales and over long periods deploying all available past, present, and future sensors. The Special Issue on land cover and land cover change monitoring will address these demands providing examples from recent research to cope.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
