# Impact of Agricultural Land Use, Economic Growth and Trade on Greenhouse Gas Emissions

### Message from the Guest Editor

Greenhouse gas emissions emanate from different types of economic activities ranging from agricultural land use to international trade, and are critical to sustainable development. All countries are committed to combating global warming. This creates the issue of sustainable development because to attain a certain level of economic growth and sustainable development is threatened by the controversial issues of the environment. Likewise, for the implementation of effective and efficient environmental control policies, it is critical to understand how economic expansion and environmental degradation are linked. Attaining climate mitigation goals through management of land, economic growth, and trade may involve co-benefits by reducing land degradation, desertification, and energy consumption. This Special Issue seeks manuscripts that explore sustainability questions based on efficient and sustainable land use, sustainable economic growth, and environmentally friendly trade openness to advance our understanding of how these factors which have been fundamental to driving the climate crisis may also be essential to solving it.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
