

Special Issue

Land Cover, Climate Change, and Environmental Sustainability

Message from the Guest Editors

The current Special Issue of *Sustainability* titled **Land, Climate Change, and Environmental Sustainability** aims to present innovative and high-quality research findings at the intersection between land, climate change and sustainability, especially to enhance the understanding that land use practices can continue to succeed in meeting people's needs, whilst enhancing biodiversity and contributing to climate change mitigation and adaptation. In this Special Issue, original research articles and reviews are welcome, areas of research able to include, but not limited to, the following:

- Land, climate change and environmental sustainability nexus;
- Advanced methods and analyses in land use land cover studies to better understand the causes of land use change and comprehensive consequences of land use change;
- Climate change mitigation potential of land use systems and best practices to enhance ecosystem services;
- Adaptation needs and options in land use sector that maximize climate benefits with the least impact on provisioning services from the land system.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
