

Special Issue

Leaders and Team Members' Perceptions of Cooperation at Work

Message from the Guest Editors

The purpose of this Special Issue is to provide scholars and practitioners with a wide overview of cooperation, with impactful insights for practice and avenues for new research. This Special Issue seeks papers that address the following topics. These are illustrative only, as we will also consider other topics related to cooperation in teams.

- What are the new and emerging theories that describe the cooperation processes in teams and multiteam systems?
- Are there any new constructs, dimensions, or factors that help define and understand the evolution of cooperation in teams over time?
- What are the implications of cooperation within teams and between teams and leadership across multiple contexts (e.g., top management, project, sports, extreme, virtual)?
- How can we build and enhance cooperation between teams, team members, and team leadership?
- Which individual and collective interventions work and why? What evidence exists to support their effectiveness?
- What are the methodological tools or general approaches that enable an understanding of cooperation dynamics across organizational levels and over time?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
